Dear Norm

**Subject: B.C. Light Fixtures**

We have used B.C. Light LU 1000 metal halide fixtures in several aircraft hangars we have recently constructed in Victoria and are amazed at their performance. The buildings have very even light distribution, are very bright, and shadowing under the airplanes is so minimal that task lighting is seldom required anymore for technicians servicing them.

We would not hesitate to recommend B.C. Lights and we will certainly be using them again whenever possible.

Sincerely

A handwritten signature in cursive script that reads "Steve Butler".

Dear Norm:

**Re: High Efficiency Lighting**

---

We specified BC Light Manufacturing Inc LU 1000 Metal Halide lighting fixtures for the main process building at the new Water Reclamation Facility in Powell River, British Columbia.

These lights have proven to be remarkably efficient and economical to operate. The corrosion resistant powder coated aluminum housing is ideal for the harsh environment and the high efficiency means more light with less maintenance.

We intend to continue using BC Light Mfg products in future installations and would not hesitate to recommend them to others.

Sincerely,

CANADIAN WASTEWATER CORPORATION
